

## EDUCATION

### Graphic Era Deemed University

BTech in Computer Science and Engineering | **8.6** | 2020

### S.G.R.R.Public School

Intermediate | **87.5 %** | 2016

### S.G.R.R.Public School

Highschool | **9.6** | 2014

## SKILLS

React JS

Node JS

MongoDB

Mongoose

HTML

CSS

C++

JavaScript

MySQL

SAP BO

Bootstrap

TailwindCSS

## TOOLS

Git, Github, Visual Studio, IDT, UDT, Webi, ThunderClient

## ACHIEVMENTS

- Rising Star : Award for outstanding performance .
- AZ-900 Microsoft Azure Fundamentals.
- Ocean L1 Certification : Visualization Consultant (SACBO)
- **70+** questions solved in Leetcode.

**[Leetcode/Sourabhsrc](#)**

## INTERESTS

- Programming
- Football
- Fitness

## SUMMARY

**2.7+ yrs** of experience as a React-developer, implementing user interfaces for web-based **Supply Chain application**. Skilled in data visualization libraries such as **yworks** and **ag-grid**. Collaborates effectively with team members to ensure code quality, maintainability, and scalability.

## WORK EXPERIENCE

### Associate Consultant

Oct 2020 - Present

Capgemini

- Designed and developed the user interface for a web-based supply chain application using **ReactJS 18**, resulting in a responsive and user-friendly product tracking system.
- Utilized data visualization libraries such as **YWorks** and **Ag-Grid** to create dynamic and interactive data displays, allowing users to filter and analyze product information with ease.
- Conducted thorough testing and debugging of the application, ensuring that it was bug-free and provided a seamless user experience.

## PROJECTS

### Event Manager App | [\\_github/EventManagerAPP](#)

- Event Manager is react-application for colleges to manage internal college events and participation.
- Tech Stack - **React JS, Node JS, MongoDB, Express**
- Manage state using Redux.

### iNotebook | [\\_github/iNotebook](#)

- iNotebook is a note app where you can perform CRUD operations in your imp notes.
- Tech Stack - **React JS, Node JS, MongoDB, Express**
- Implemented User authentication and manage state using context API.

### News-App | [\\_github/newsApp](#)

- Fetching news from free API and showing news category-wise using **React JS**.
- Implemented Infinite Scroll, top loading bar and Pagination.

### Media Player - Spotify | [\\_github/mediaPlayer](#)

- Created a responsive media player like Spotify using **HTML,CSS and JavaScript**.
